A small school with a big outlook...

A message from Mrs. Scholz

Tilly, Sophie and Isla from Y6 represented our school at the Wyre Council Local Democracy Event on Wednesday morning this week. We joined some friends from Calder Vale St. John's and attended a special meeting in the council chambers. We learnt all about the role of the council and its cabinet members; the girls were asked how they would spend the climate action budget to make our area more climate friendly; we took part in a ballot for a new council member (the girls chose Mary Earps, England Goalkeeper as they thought she would be an inspirational leader) and we were able to ask members of the cabinet and the Youth Mayor questions about their roles. The children were fantastic ambassadors for our school—we hope to attend again next year!

Lead Learners

Bowland Alice- for brilliant progress in reading and spelling. Alice has amazed us all with her phonics decoding and reading on sight this week. Well done Alice!

Grizedale Grizedale's lead learner this week is Arya. Arya has shown excellent active learning this week in class that has been noticed by lots of different adults. In addition to this, she really impressed us during PE, where she led the warm up for the class, showing others how to improve their different techniques and worked really well in a team during a friendly cricket match.

Nicky Nook Fred has had an amazing week of learning. He has worked hard with all aspects of his learning but we have been really impressed with his maths. Well done Fred!

News from our classes

Bowland This week Bowland have begun to learn all about The Fire of London! They acted out the story so well and then created Pudding Lane Bakery outdoors. Cora, Alice, Sophia and Eve performed London's Burning and used scarves for the flames. EYFS made a brilliant fire engine as a big group too! The children in Y2 have been working hard to solve multiplication problems whilst Y1 have been getting better at counting in groups. EYFS have practised counting... we have watched so many lovely videos of the children counting at home forwards and backwards.

Grizedale This week in Science, we were learning all about melting. We made predictions about how long it would take some ice to melt in our hands and lots of us were very surprised to find out that it took much longer than we had anticipated! In Geography, we have continued learning about the Water Cycle and found out more about each stage using our catchy song and some diagrams. In Music, we have continued learning our new song We Will Rock You and have been trailing different performance styles to impress our audience! We have also started our new PE unit this week and have been incorporating music into our gymnastics routines.

Nicky Nook Nicky Nook have enjoyed exploring how authors develop characterisation in historical novels. As scientists we have been reading about the circulatory system and naming the parts of the heart. We loved finding out about copyright and privacy, we created posters to show our understanding. In PSHE we have all set personal goals for ourselves.
